SUMMER W

The Baja team has officially kicked off development of our V3 car. This marks the beginning of an exciting new engineering cycle. After reflecting on past car performance and competition feedback, we have set clear goals and established a development timeline targeting completion in Fall 2027. We're excited to see what this next generation of engineering brings!

WINTER BAJA

In January, our team had the opportunity to travel to Houghton, Michigan to compete in Winter Baja, hosted by Michigan Tech. For the first time ever, our team brought two vehicles to the event, which allowed more members to get involved throughout the weekend and gain valuable seat time. Competing in Michigan's winter conditions tested our durability and gave us valuable real-world feedback that we're excited to use as we continue improving and developing V3.

Flyer Funder

We're excited to announce that we are participating in the University of Dayton's Flyer Funder fundraising initiative. This program provides an opportunity for alumni, friends, family, and supporters to contribute to the success of our team.

Funds raised will support:

- Essential components,
- Precision tools
- Competition expenses

The campaign goes live March 9th.
Give Here: [Support UD SAE Baja](#)

We would greatly appreciate your support!

TECHFEST

The Baja team had the opportunity to volunteer at TechFest alongside the Dayton Engineers Club. This event is dedicated to inspiring young students to explore careers in science, technology, engineering, and mathematics (STEM). Big thanks to the Dayton Engineers Club for connecting us with this great event.
